Cardboard Furniture Creations:

Design the most elaborate and functional cardboard furniture piece. Ideas may focus around, but are not limited to chairs, recliners, and tables. Teams are allowed to use adhesive, fasteners, or tape to secure and fasten the cardboard together.

Your project may not be physically larger than 4'x6'

Grading Criteria:

	10	5	1
Creativity	Student created a brand new object or idea that has never be done before.	Student modified a pre-existing idea and made it more useful or functional.	Student used Pinterest, Instructables, or another reference site to gain their idea.
Design	The design is well thought out from aesthetics to individual components and assembly procedure..	The design is good, and most everything was plan out. Though was taken on the design, but one or two things could have been improved	The design works, but things could have easily been changed including individuals pieces to assembly.
Appearance	Appearance was a major concern and looks like the item could be sold in a store.		Appearance was not necessarily a concern. Parts are rough, torn, and are more functional than pretty.
Functionality	Project can easily be used and looks like it will stand up to routine use.	Project will hold up to light and occasional use.	Project functions, but may not hold up to more than a few uses.
Construction	The construction is flawless and solid	Construct was a concern, but a few items look problematic.	Several pieces are loose and many things are flimsy.
Documentation of Production	Student documented the design and construction process flawlessly. Each step is visible and easily identifiable.	Student documents almost all of the major steps, but some items and step missing.	Student documented most of the several of the major parts such as the design, layout and final construction. However, many steps are missing.
